

Professional Development Alternatives Online Modules

www.fl-pda.org

High-quality online content and activities. Available statewide and free to Florida educators. Classroom-related assessment tasks. Designed to assist educators with responding to the various instructional and behavioral needs of each individual learner in order to maximize achievement for all students. Facilitated modules provide ongoing collaboration with colleagues and expert facilitators.

Many of the PDA modules support the recertification requirement of 20 hours in teaching students with disabilities, however, each school district or private school agency determines which modules satisfy the content requirement for their employees. FDLRS reports inservice credits to school districts and private school agencies through their approved Master Inservice Plan (MIP) or its equivalent. It is the responsibility of educators who are not employed to ensure, prior to registration, that a district or agency will submit their inservice credits to FDOE.

PDA: Paraprofessionals Support for Students with Disabilities

The goal of this module is to provide paraprofessionals with introductory information about the foundations of exceptional student education in Florida, the provision of services, and appropriate strategies to support the instructional practices for students with disabilities.

This online, independent study PDA professional development module was NOT developed with the intention of meeting the recertification requirement for teaching students with disabilities credit (Renewal Credit in Teaching Students with Disabilities DPS 2014-12); however, each school district or private school agency determines if the module satisfies the requirement for their employees.
